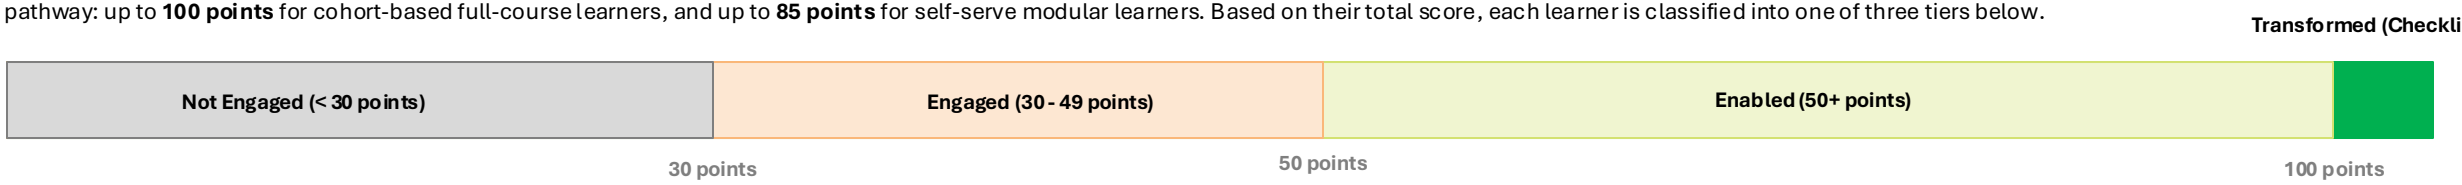
Learner Classification: Scoring Tiers for CY26 Enrolments

WADHWANI FOUNDATION

How Point Scale Works

Learners earn points by completing structured activities on the WSN platform such as video assessments, collaborative reflections, MCQ-based assessments, Interview Prep, and career tools. The maximum score varies by learning pathway: up to **100 points** for cohort-based full-course learners, and up to **85 points** for self-serve modular learners. Based on their total score, each learner is classified into one of three tiers below.



Tier	Score Threshold	Certification Requirement	What It Signals	Who Qualifies
Transformed	Checklist-based (not points)	All 3 mandatory components must be completed and passed: (1) Pre/Post Video >=3/5 (2) >=70% of Collaborate reflections passed, (3) Full Course MCQ (FA + SA) passed (>=70% score in FA and SA weighted) *(4) Interview Prep will become part of the criteria (when it is integrated into the course)* Career Advisor/ Job Connect encouraged but not mandatory.	Learner has completed the full structured learning journey and demonstrated minimum viable competency across all core components. Highest tier & certifies meaningful transformation.	**Cohort-based full-course learners only**. Not applicable to self-serve / modular learners as Collaborate is not available in that pathway.
Enabled *(earlier called Partial Transformation)*	50+ points (but not Transformed)	Score >=50 points across any combination of components. Not required to meet the Transformation checklist.	Meaningful capability building with demonstrated platform engagement. Learner is a strong candidate for placement support and further program activation.	Achievable through both pathways. **Cohort-Based:** partial Collaborate + MCQ + other components. **Self-serve:** 10 modules (50 MCQ pts), or 5 modules + Interview Prep + Pitch Trainer + Career Advisor (~60 pts).
Engaged	30–49 points	Score 30–49 points across any combination of components.	Active platform usage beyond registration. Learner is building skills but has not yet reached the Enabled threshold. Primary target tier for self-serve / modular learners, given the absence of Collaborate.	Achievable through both pathways. **Cohort-Based:** partial reflections + MCQ. **Self-serve:** ~5 modules (25 MCQ pts) + Interview Prep (15 pts) = 40 pts.

Score thresholds for Enabled and Engaged are pathway-agnostic. For component-level scoring detail, see Cohort-Based Full-Course Journey (Slide 3) and Non-Cohort / Self-Serve Modular Journey (Slide 4).

Cohort-Based Full Course Journey: Scoring Model (CY26)

Component	Weight (Max Score)	Unit of Measurement	Scoring Logic (Consistent)	Role in Learning
Pre/Post Video (AI Evaluated)	15	1 submission	15 points if score >= 3/5, else 0. Pass threshold: 3 out of 5.	Individual capability demonstration
Collaborate Activities	Up to 40	Reflections	Points are awarded proportionally based on passing up to 70% of required reflections; full 40 marks are awarded once >=70% of reflections are passed. e.g. In a course with 30 reflections, completing 15 (~ 50%) gives 29 points; >=21 (70%) gives 40 points.	Applied learning, workplace simulation
Full Course MCQ (FA + SA)	Up to 25	Course assessments	Points awarded based on attaining >=70% in each assessment. Total FA score (15) is equally distributed across all FAs; points are awarded per FA passed. SA carries 10 points and is awarded only if >=70% is achieved. Total capped at 25. e.g. if there are 5 FAs and the learner passes 4 (>=70% score), they earn 12 points; if they also pass SA (>=70%), they earn 10 more -> total 22 points	Structured pathway competency validation
Interview Preparation	15	Question-based journey	1.5 points per passed question (max 10); total capped at 15. Scored based on the longest single journey taken; multiple short journeys are not cumulative.	Job readiness and interview capability
Career Advisor*	5	Completion	5 points on completion (binary); where completion requires: (1) completing the Passions (2) completing the Questionnaire, and (2) favoriting one or more roles. *Interchangeable with Job Profile/ Job Connect; max 5 pts regardless of both being completed*	Job alignment and decision support
(OR) **Job Profile / Jobs Connect***	5	Profile completion	5 points on completion (binary); where completion is defined as fully completing the Jobs Connect Job Profile. *Interchangeable with Career Advisor; max 5 pts regardless of whether both are completed*	Career enablement and employability signal

Learner Classification Thresholds: Enabled (50+, not Transformed), Engaged (30 – 49)

Key Points:

1. **Score Normalisation:** Total maximum score is normalised to 100 across all components
2. **Mutually Exclusive Pathways:** Full course MCQ is considered mutually exclusive pathway, and capped at 25
3. **Pass Based Scoring:** Learners earn points only when they meet defined minimum competency thresholds (not just completion)
4. **Collaborate Threshold Logic:** Full points (40) are awarded once >=70% reflections are passed; below the threshold, marks are awarded proportionately based on pass rate

* Career Advisor and Job Connect serve similar purpose (career guidance and job aspiration support) and are treated interchangeably for scoring.

Non-Cohort/ Self-Serve Journey Modular Journey: Scoring Model (CY26)

Component	Weight (Max Score)	Unit of Measurement	Scoring Logic	Role in Learning
Pre/Post Video (Pitch Trainer)	15	1 submission	15 points if score >= 3/5, else 0. Pitch Trainer is the self-serve equivalent of the Post Video assessment.	Baseline capability signal assesses improvement pre vs. post learning
Modular MCQ (Self-Serve)	Up to 50	Per module (max 10 modules @ 5 pts each)	5 points per passed module (capped at 50 for self-serve pathway, vs. 25 in the cohort model).	Primary scoring engine for self-serve learners. Higher weight reflects absence of Collaborate. Will be recalibrated as GenAI assessments are introduced.
Interview Preparation	15	Question-based journey	1.5 points per passed question (max 10); total capped at 15. Scored on longest single journey taken not cumulative across sessions.	Job readiness signal. Self-serve learners rely heavily on this to reach Enabled state.
Career Advisor* (OR)	5	Completion	5 points on completion (binary); where completion requires: (1) completing the Passions (2) completing the Questionnaire, and (2) favoriting one or more roles. *Interchangeable with Job Profile/ Job Connect; max 5 pts regardless of both being completed*	Job alignment and decision support
Job Profile / Jobs Connect*	5	Profile completion	5 points on completion (binary); where completion is defined as fully completing the Jobs Connect Job Profile. *Interchangeable with Career Advisor; max 5 pts regardless of whether both are completed*	Career enablement and employability signal

Learner Classification Thresholds: Enabled (>= 50, not Transformed), Engaged (30 – 49)

Key Points:

1. **Score Normalisation:** Total maximum score is normalised to 85 across all components
2. **Mutually Exclusive Pathways:** Modular/ Self-Serve MCQ is considered mutually exclusive pathway, and capped at 50 currently
3. **Pass Based Scoring:** Learners earn points only when they meet defined minimum competency thresholds (not just completion)

* Career Advisor and Job Connect serve similar purpose (career guidance and job aspiration support) and are treated interchangeably for scoring.

Global Executive Summary | Performance vs Plan

Outcomes Snapshot (Global)

	Ecosystem		Non Ecosystem	
Metric	YTD Actual / YTD Plan	% attainment	YTD Actual/ YTD Plan	% attainment
Attrib. Incr. Placements	544 / 718	76%	367 / 485	76%
Placements (PLC)	1,789 / 2,842	63%	1,272 / 2020	63%

Outcomes Drivers

Source Split (by Year)

Metric	Source	Ecosystem	Non-Ecosystem
Attrib. Incr. Placements	2026 Enrolments (ENR)	-	-
	2025 Enrolments (ENR)	544 (60%)	367 (40%)
Placements (PLC)	2026 Enrolments (ENR)	-	-
	2025 Enrolments (ENR)	1,789 (58%)	1,272 (42%)

Transformation Quality (for CY26 enrolments)

Type	Ecosystem	Non-Ecosystem
Transformations (TRF)	0	0
Partial Transformations (p-TRF)	864 (13%)	6039 (87%)

Country Snapshot

Region	Attrib. Incr. Placements	% of Plan	Placements	% of Plan	Notes
India	701 / 1,053	67%	2,378 / 4,212	56%	Tracking Above Plan
Philippines	198 / 97	204%	638 / 270	236%	Tracking Above Plan
Indonesia	0 / 16	0%	1 / 100	1%	Tracking Below Plan
Mexico	0 / 27	0%	0 / 250	0%	Tracking Below Plan
Brasil	12 / 8	150%	44 / 30	146%	Tracking Above Plan
Egypt	0 / 0	-	0 / 0	-	

Key Observations:

Outcome Snapshot:

- **Placement outcomes are currently being driven by CY25 enrolments**, as CY26 cohorts are yet to complete the ~3-month eligibility window, resulting in limited contribution from current year enrolments
- Attributable Incremental Placements & Placements are currently being driven primarily by Ecosystem partners (60% incr. placement realization, 58% placement realization)

Output Drivers:

- March outputs are primarily driven by Enabled (partial transformation), with Non-Ecosystem learners contributing majority (87%), while Transformations & Ecosystem pathways have yet to translate into outputs

Country Snapshot:

- Placements are concentrated in India, Philippines, and Brasil, with Philippines and Brasil tracking above overall plan, indicating strong execution
- Philippines leads performance (~204% IPS; ~236% PLC), followed by Brasil (~150% / 146%)
- India brings in the bulk of placements & attributable placements, however, falls short of its plan (67% YTD plan)
- Indonesia, Mexico, and Egypt have not yet shown placement outcomes, with performance expected to ramp up as cohorts become eligible.

Refer to **Appendix A – Placement Extrapolation (2025)** for Placement and Attrib. Incremental Placement Nos. (from CY25) enrolments in YTD26

Legend: <50%, 50-80%, >80%

	ENR (Self-Serve) (I/P)	0/0	-	0/0	-	13/250	5%	13/4000	0%

Key Observations:

Ecosystem:

1. **Enabled (p-TRF) significantly ahead of plan (230%)**
   - Strong early-stage engagement across markets indicate journey access and adoption are working
2. **Structural drop-off from Enabled -> Transformed**
   1. **Primary bottleneck:** negligible post-video adoption, preventing learners from meeting full transformation criteria (refer to **Slide 5: Component Utilization across Learner Pathways**)
   2. Result: Enabled scales, but Transformations remain constrained
3. **Market Signal:**
   - India and Indonesia show strong enabled momentum
   - Egypt, Mexico, Brasil: Hybrid enrolment lagging, limiting transformation pipeline

Non-Ecosystem:

1. **Enabled (p-TRF) driving output performance (149% YTD)**
   1. Mirrors ecosystem: scale achieved through partial transformation, not full transformation
2. **Self-Serve enrolments drive enrolment scale (~98%),** especially in countries such as Mexico, Brasil and Philippines

Key Insight: Performance is ahead on Enabled, but constrained on Transformations. The system is driving reach, but structural gap in post-video adoption is limiting conversion to full transformations. Refer to **Slide 5: Component Utilization across Learner Pathways**

Refer to **Appendix B – Core Metrics** for definitions of each KPI, their data collection methodology and any associated quality assurance process

Legend: <50%, 50-80%, >80%

	PLCs (p-TRF)	-/100	-	-/1000	-	-/2	-	-/100	-

Key Observations:

Incremental Placement & Placements: Tracking yet to commence

- Placement tracking for CY26 will be initiated once the transformed and enabled learners complete ~ 3-month eligibility window

Refer to **Appendix B – Core Metrics** for definitions of each KPI, their data collection methodology and any associated quality assurance process

Legend: <50%, 50-80%, >80%

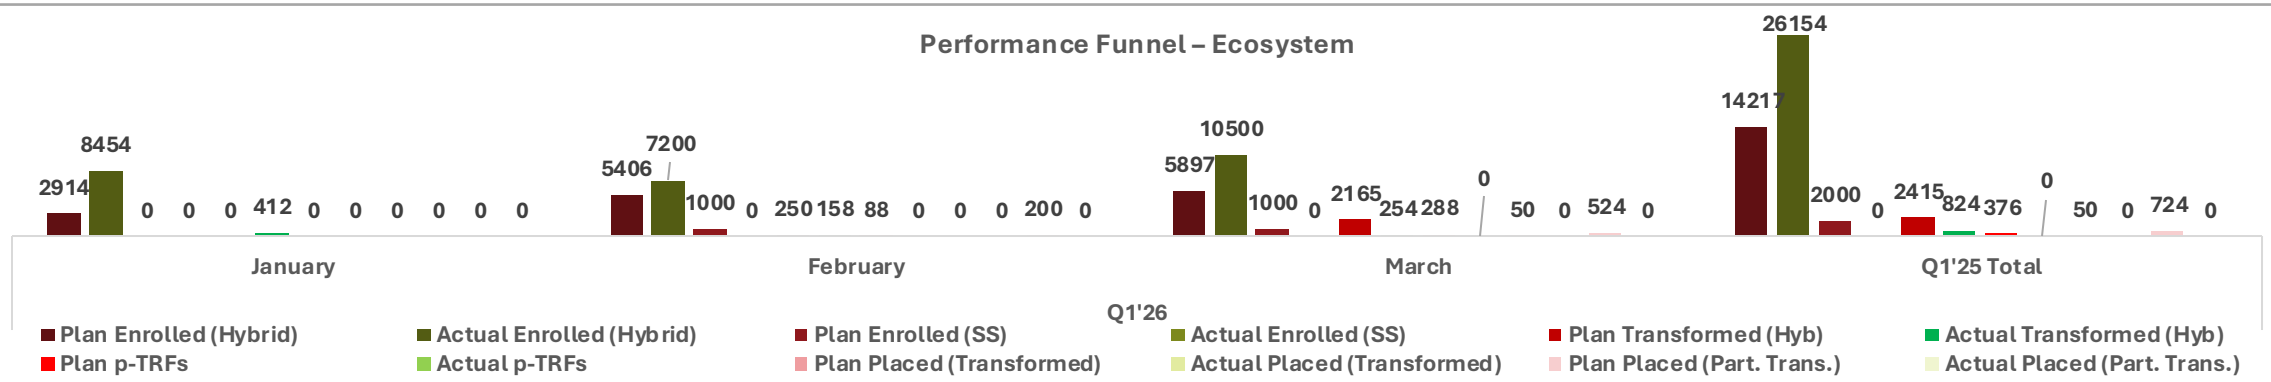
Component Utilization across existing Pathways

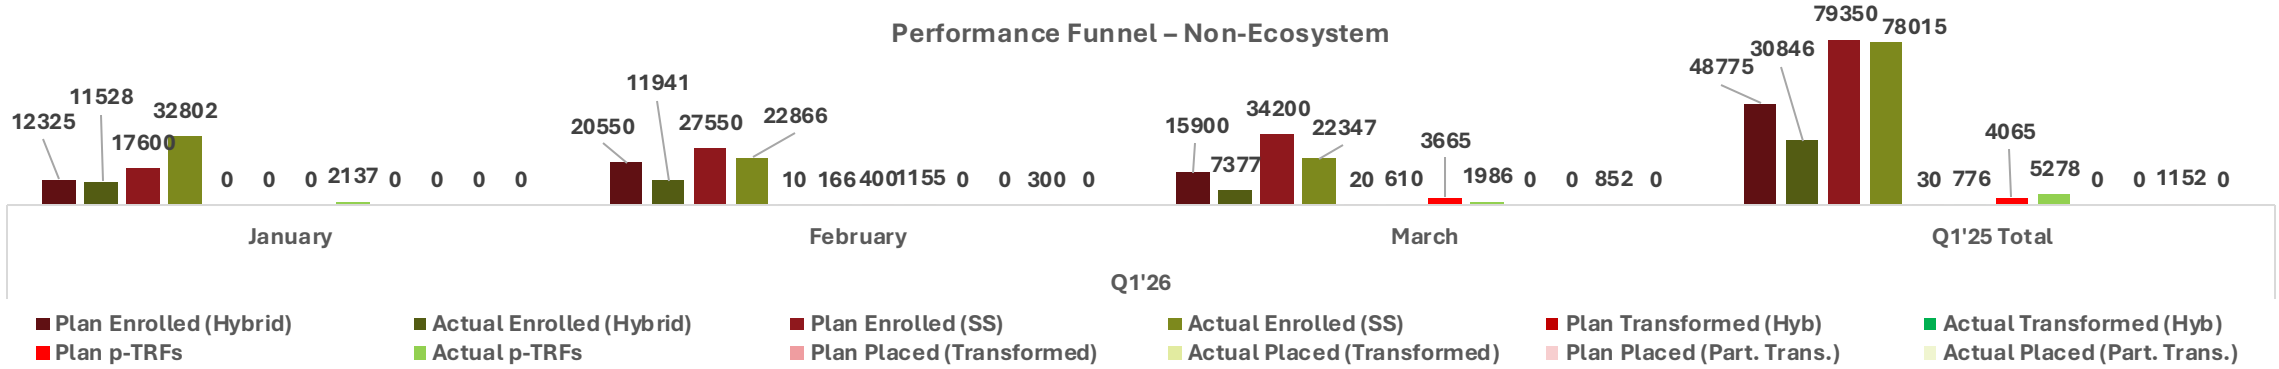
Component	Focus (Cohort-Based) (n = 57,687)	B2B (Cohort-Based) (n = 11,645)	B2C (Self-Serve) (n = 67,014)
Course/ Modules Passed >=70% (FA)	6%	12%	48%
Summative Assessment (SA)	6%	12%	-
Collaborate Passed (>=70%)	13%	-	-
Pre-Video Completed	8%	0.4%	0.1%
Post-Video Completed + Rating >=3	-	-	-
Career Advisor	-	-	-
Interview Prep	0.3%	0.1%	0.3%
	Transformed(-), Enabled (5%), Engaged (12%)	Enabled (-), Engaged (-)	Enabled (8%), Engaged (3%)

Key Observations:

1. **Post Video adoption is effectively zero across all pathways**: this is an adoption gap
2. **Career Advisor completions exist within the broader learner ecosystem**, but do not intersect with Focus, B2B or B2C/ Self-Serve learners tracked here – 0% represents population segmentation and not tool adoption
3. **Collaborate remains Focus's highest touch-point but is entirely absent for B2B learners:** Very likely the collaborate sessions aren't happening in current B2B cohorts
4. **B2C 48% module completion is a strength:** With 32k learners actively completing modules, a targeted push towards Career Advisor or Interview Prep would shift classifications faster
5. **Close the awareness gap before engagement gap:** Data suggests some of the tools (Interview Prep, Pre/Post Video) are unknown or hard to find. Targeted in-platform nudges, prompts and specific communication should help alleviate this gap

Global | Performance vs Plan Operational Drivers (2026)





Key Observations & Action Notes

Incremental Placements & Placements: Placement tracking will commence post the ~3-month eligibility window from transformation/ enablement.

Ecosystem:

1. **Transformations:** No transformations have been recorded yet (0%)
2. **Enabled (Partial Transformation):** Learners classified as *enabled* have exceeded the YTD plan (229%, 864 vs 376 YTD plan)
3. **Enrolments:** Hybrid enrolments significantly exceeded plan (184%, 26K vs 14K YTD Plan), with strong performance sustained across months.

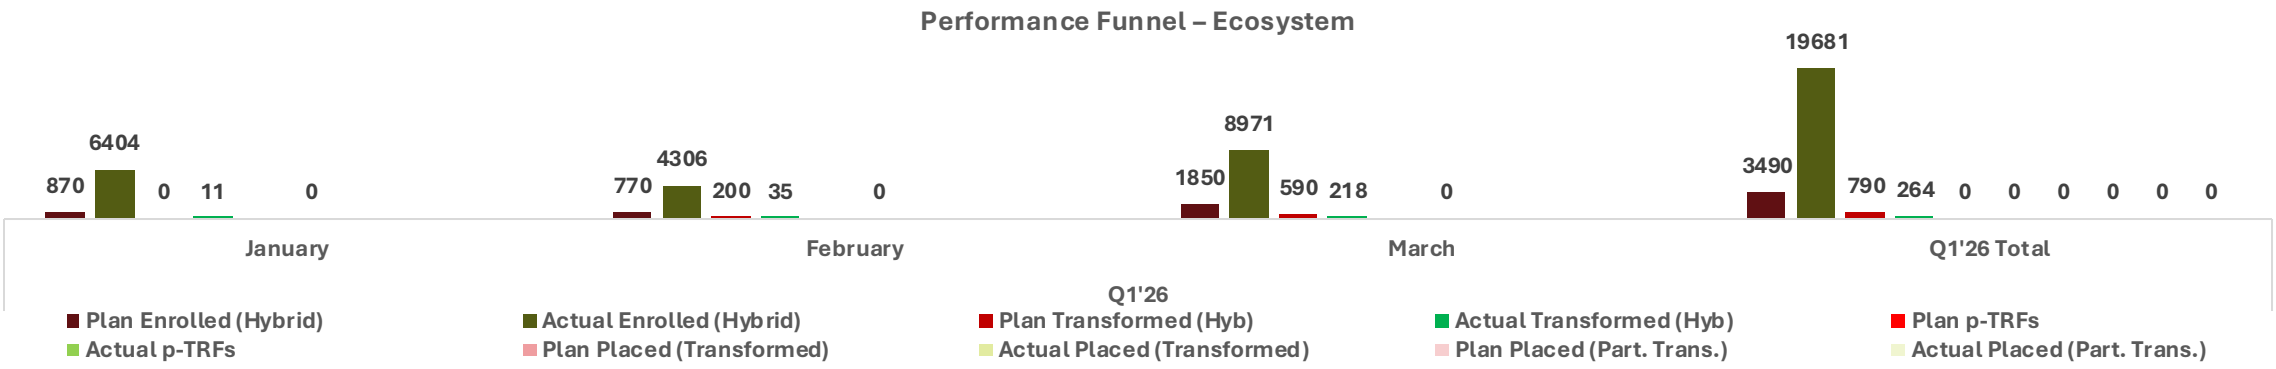
Non- Ecosystem

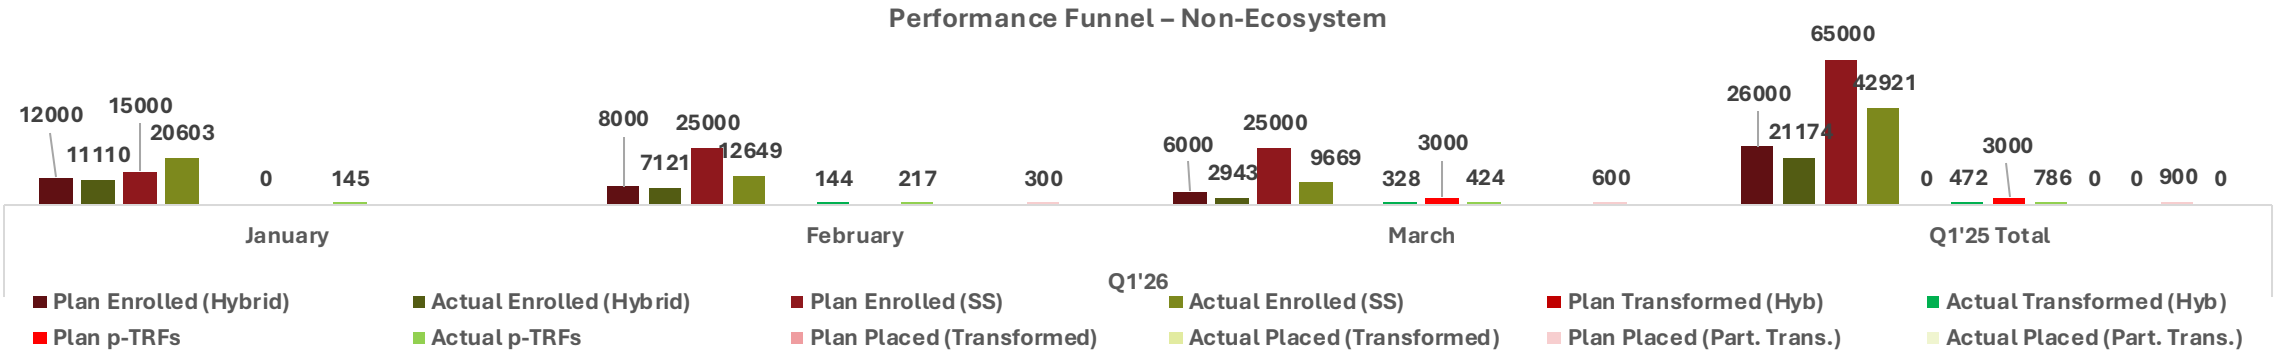
1. **Transformations:** No transformations have been recorded yet (0%)
2. **Enabled (Partial Transformation):** Learners classified as *enabled* have exceeded the YTD plan (148%, 6k vs 4k YTD plan)
3. **Enrolments:** While Hybrid enrolments remained below plan across Q1 (63%, 30.9K vs 48.8K YTD Plan), Self-Serve enrolments contributed significantly to overall volumes (98%, 79.4K vs 78KYTD plan)

Self-Serve enrolments are currently being reported to Non-Ecosystem and may get reclassified in the upcoming reports.

Legend: <50%, 50-80%, >80%

India | Performance vs Plan Operational Drivers (2026)





Key Observations & Action Notes

Incremental Placements & Placements: Placement tracking will commence post the ~3-month eligibility window from transformation/ enablement.

Ecosystem:

1. **Transformations:** No transformations have been recorded yet
2. **Enabled (Partial Transformation):** Learners classified as *enabled* have exceeded the YTD plan (high, 245 vs 0 YTD plan)
3. **Enrolments:** Hybrid enrolments have significantly exceeded the YTD plan (564%, 19.6k vs 3.4k YTD plan).

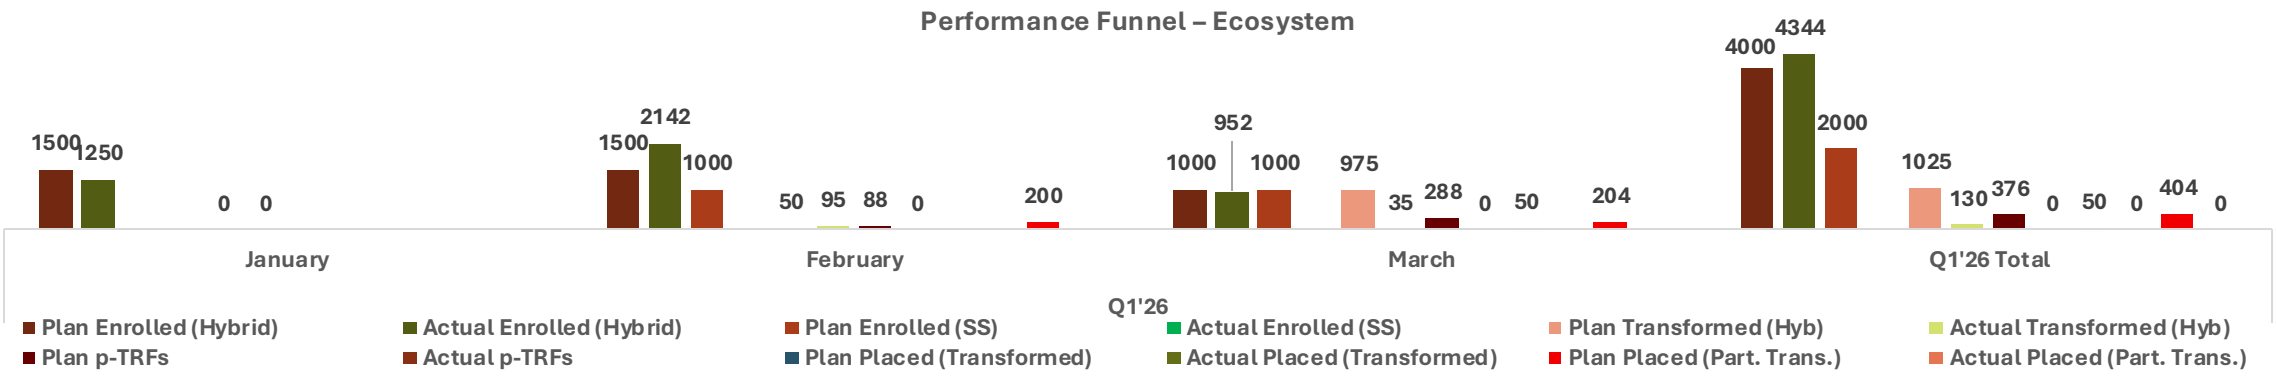
Non- Ecosystem

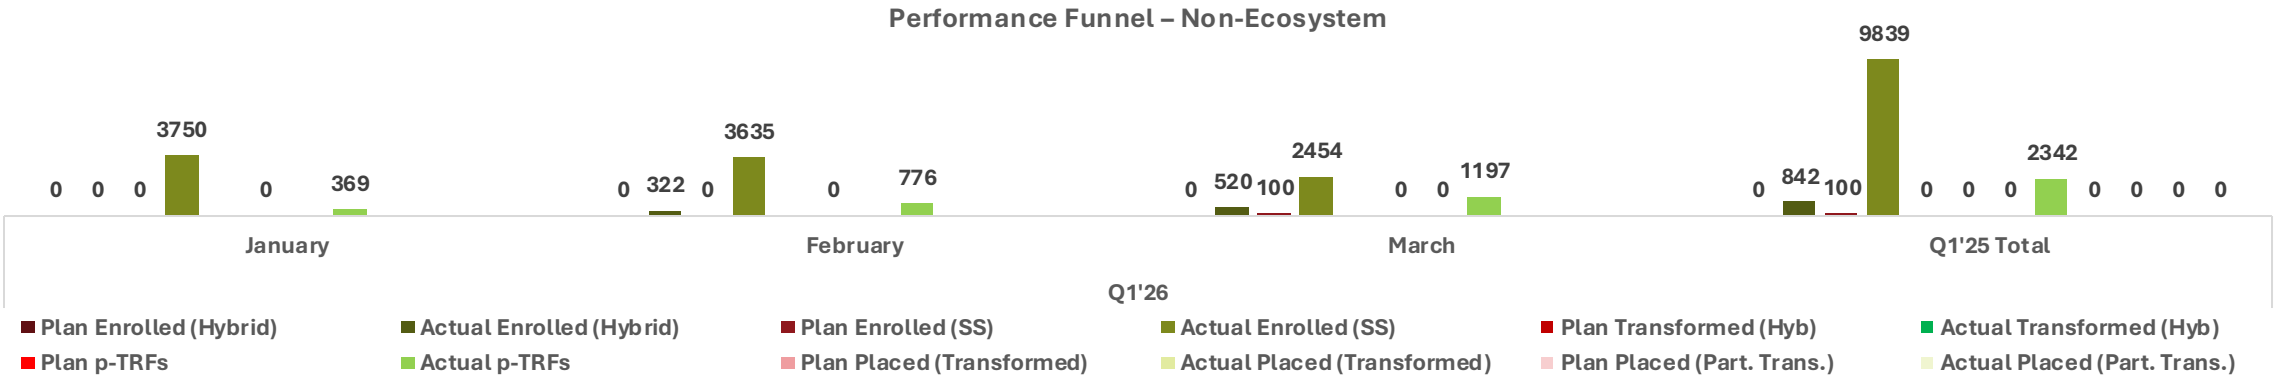
1. **Transformations:** No transformations have been recorded yet
2. **Enabled (Partial Transformation):** Learners classified as *enabled* currently remain below plan (40%, 1.2k vs 3k YTD plan)
3. **Enrolments:** While Hybrid enrolments remain moderately below plan (82%; 21.2K vs 26K), Self-Serve enrolments remained below plan (66%, 42.9K vs 65K)

Self-Serve enrolments are currently being reported to Non-Ecosystem and may get reclassified in the upcoming reports.

Legend: <50%, 50-80%, >80%

Philippines | Performance vs Plan Operational Drivers (2026)





Key Observations & Action Notes

Incremental Placements & Placements: Placement tracking will commence post the ~3-month eligibility window from transformation/ enablement.

Ecosystem:

1. **Transformations:** No transformations have been recorded yet (0%)
2. **Enabled (Partial Transformation):** Learners classified as *enabled* (partial transformed) remain below YTD plan (33%, 125 vs 376 YTD plan)
3. **Enrolments:** Hybrid enrolments have slightly exceeded the YTD plan (109%; 4.3K vs 4K).

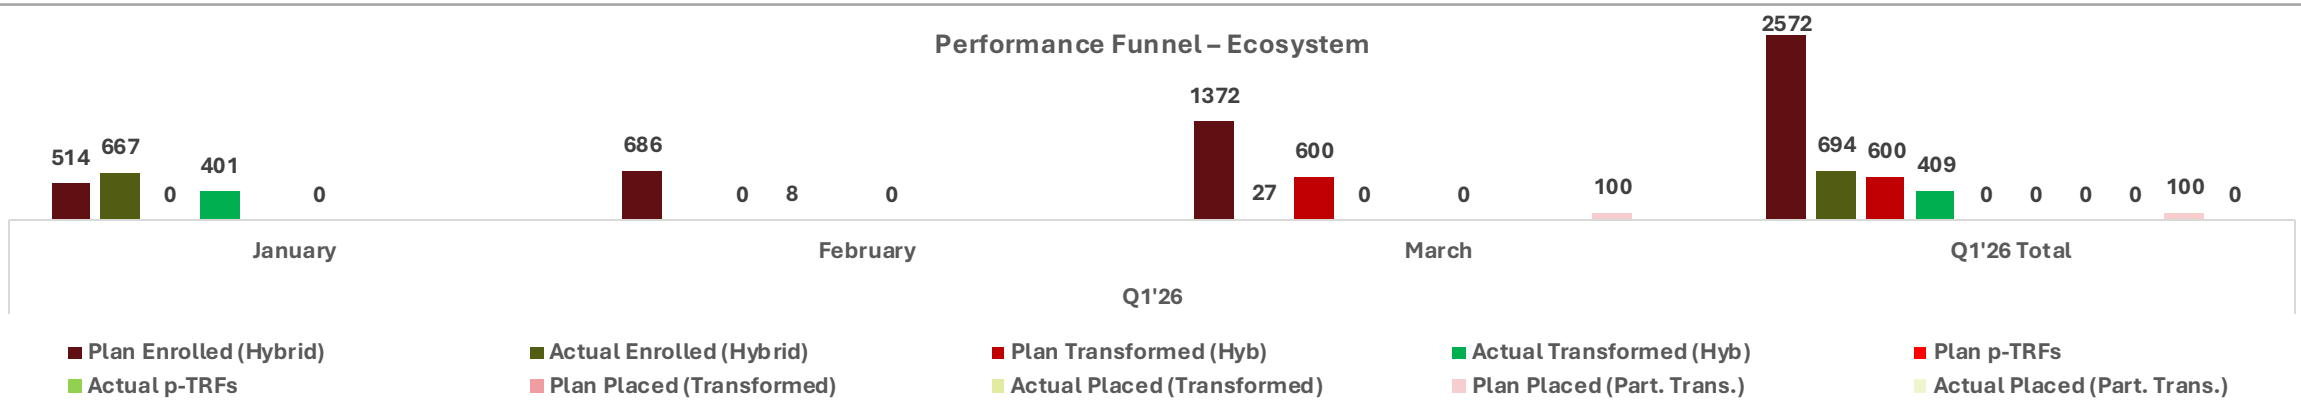
Non- Ecosystem

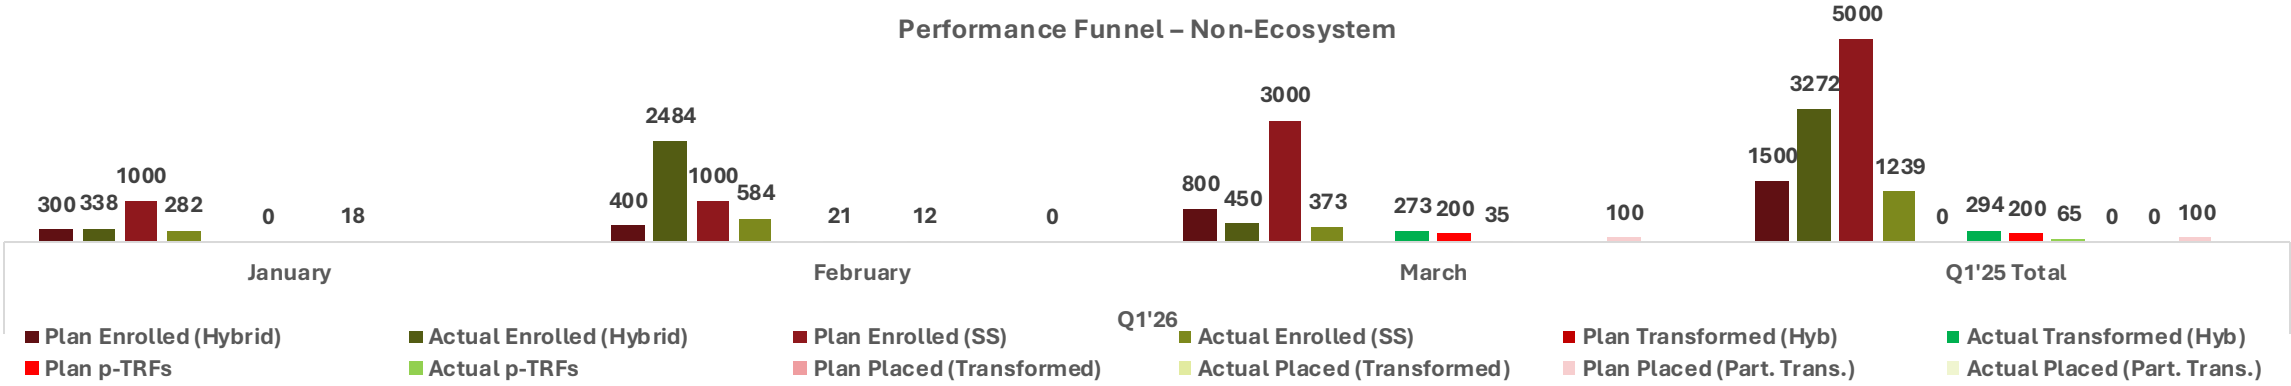
1. **Transformations:** No transformations have been recorded yet
2. **Enabled (Partial Transformation):** Learners classified as *enabled* have exceeded the YTD plan (high, 2.3k vs 0 YTD plan)
3. **Enrolments:** Both Hybrid enrolments and Self-Serve enrolments have exceeded the YTD Plans (high, 842 vs 0 Plan, 9839 vs 100 Plan)

Self-Serve enrolments are currently being reported to Non-Ecosystem and may get reclassified in the upcoming reports.

Legend: <50%, 50-80%, >80%

Indonesia | Performance vs Plan Operational Drivers (2026)





Key Observations & Action Notes

Incremental Placements & Placements: Placement tracking will commence post the ~3-month eligibility window from transformation/ enablement.

Ecosystem:

1. **Transformations:** No transformations have been recorded yet
2. **Enabled (Partial Transformation):** Early progression is visible with 472 learners reaching enabled stage.
3. **Enrolments:** Hybrid enrolments remain below the YTD plan (27%; 694 vs 2.6K).

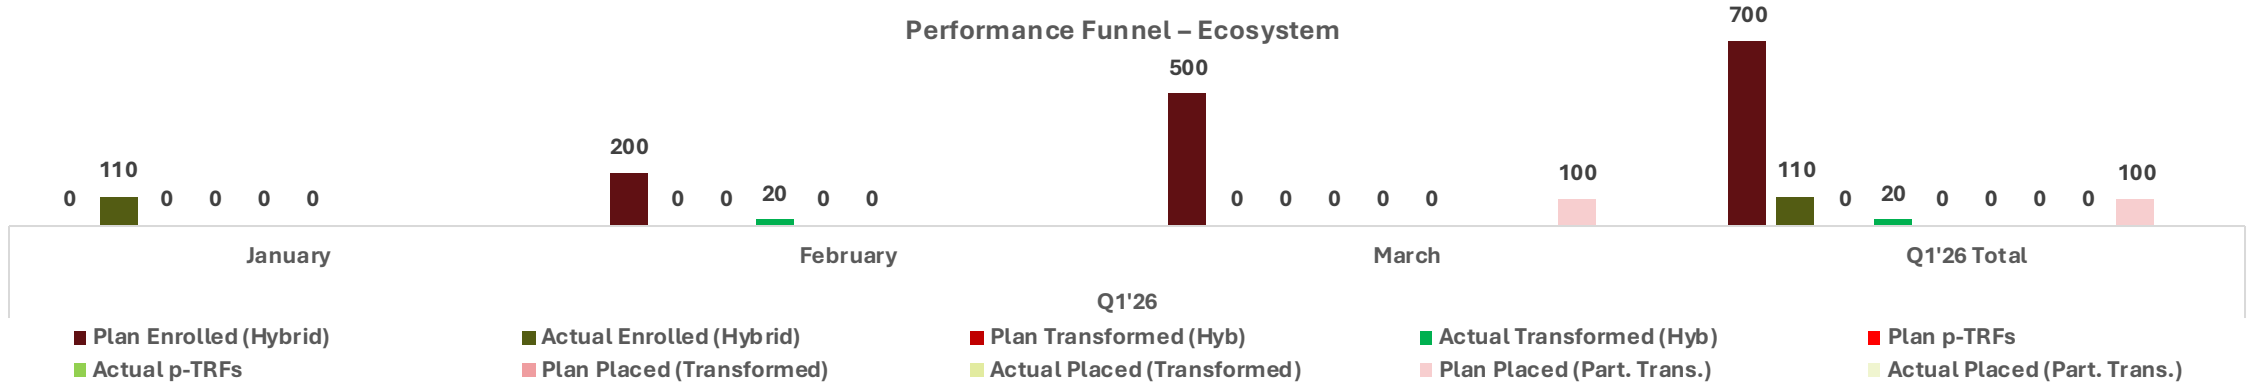
Non- Ecosystem

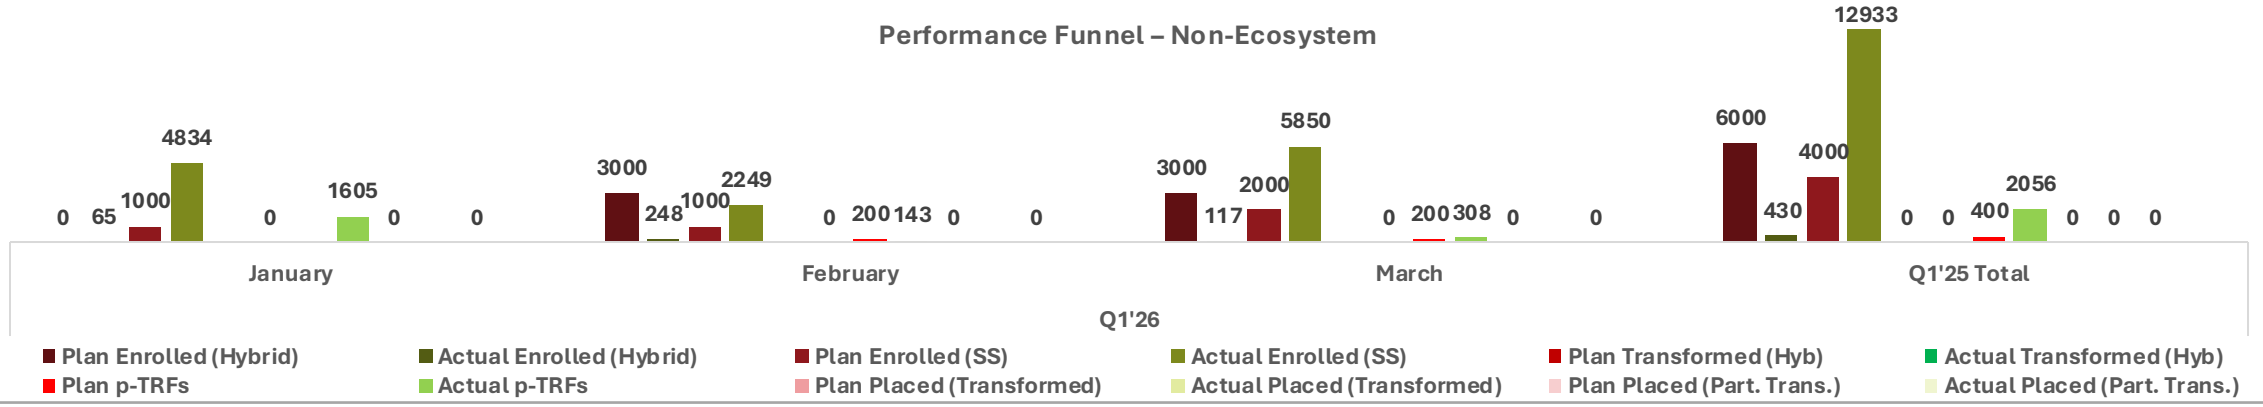
1. **Transformations:** No transformations have been recorded yet
2. **Enabled (Partial Transformation):** Learners classified as *enabled* have exceeded the YTD plan (203%, 406 vs 200 YTD plan)
3. **Enrolments:** While Hybrid enrolments have significantly exceeded plan (218%, 3.2k vs 1.5k YTD plan), Self-Serve enrolments remain below plan (25%, 1.2k vs 5k YTD plan).

Self-Serve enrolments are currently being reported to Non-Ecosystem and may get reclassified in the upcoming reports.

Legend: <50%, 50-80%, >80%

Mexico | Performance vs Plan Operational Drivers (2026)





Key Observations & Action Notes

Incremental Placements & Placements: Placement tracking will commence post the ~3-month eligibility window from transformation/ enablement.

Ecosystem:

1. **Transformations:** No transformations have been recorded yet
2. **Enabled (Partial Transformation):** Early progression is visible with 21 learners reaching enabled stage.
3. **Enrolments:** Hybrid enrolments remain below the YTD plan (16%, 110 vs 700 YTD plan).

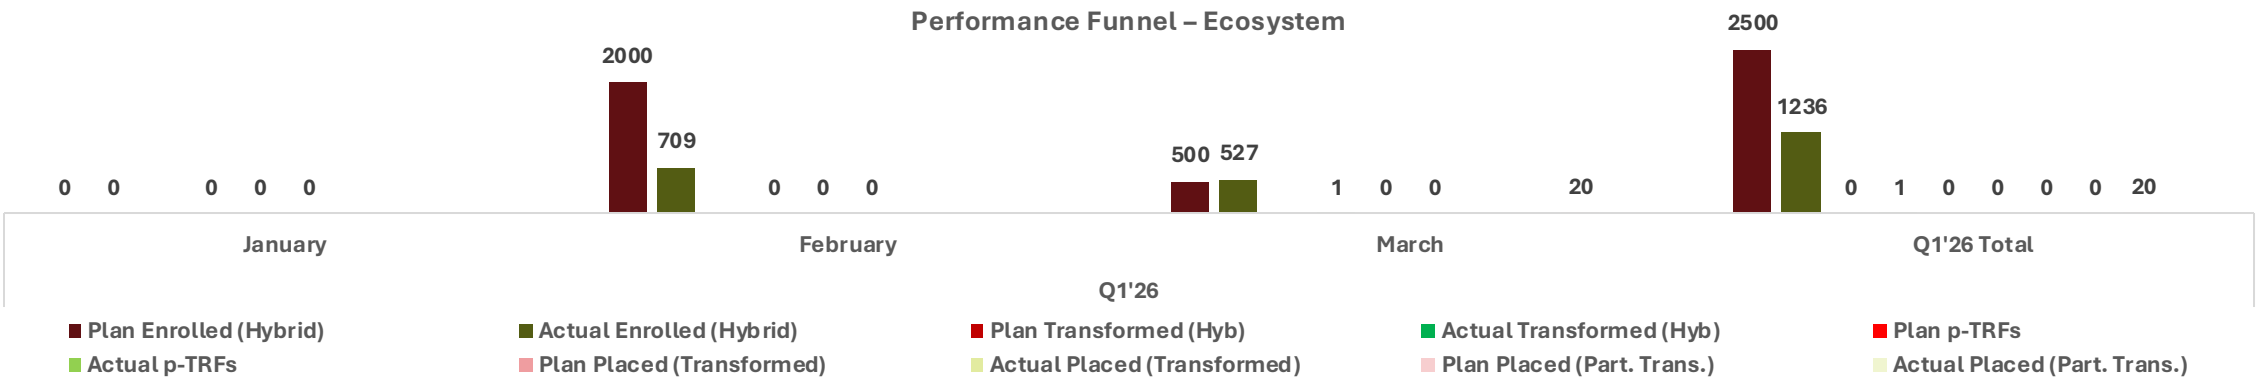
Non- Ecosystem

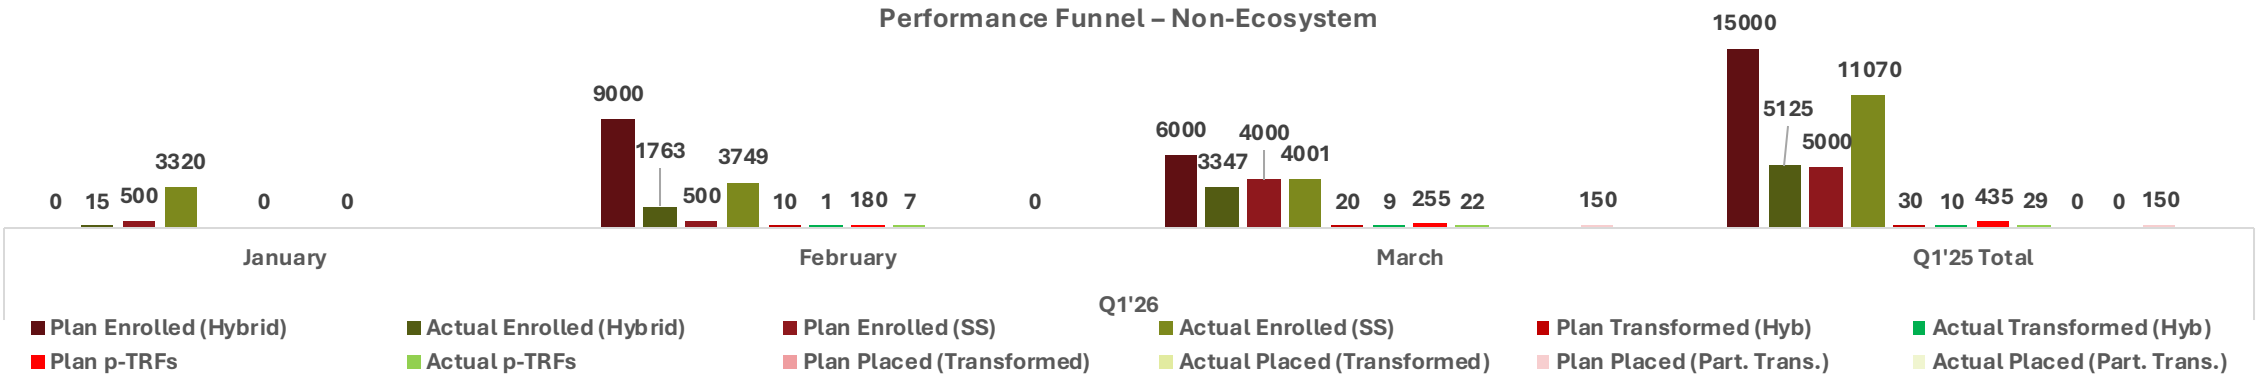
1. **Transformations:** No transformations have been recorded yet
2. **Enabled (Partial Transformation):** Learners classified as *enabled* have exceeded the YTD plan (514%, 12.9k vs 4k YTD plan)
3. **Enrolments:** While Hybrid enrolments remain significantly below plan (7%, 430 vs 6k YTD plan), Self-Serve enrolments have significantly exceeded the plan (323%, 12.9k vs 4k YTD plan)

Self-Serve enrolments are currently being reported to Non-Ecosystem and may get reclassified in the upcoming reports.

Legend: <50%, 50-80%, >80%

Brasil | Performance vs Plan Operational Drivers (2026)





Key Observations & Action Notes

Incremental Placements & Placements: Placement tracking will commence post the ~3-month eligibility window from transformation/ enablement.

Ecosystem:

1. **Transformations:** No transformations have been recorded yet
2. **Enabled (Partial Transformation):** Enablement's are at a very early stage, with 1 learner classified as Enabled (partial transformed).
3. **Enrolments:** Hybrid enrolments remain below the YTD plan (49%, 1.2k vs 2.5k YTD plan).

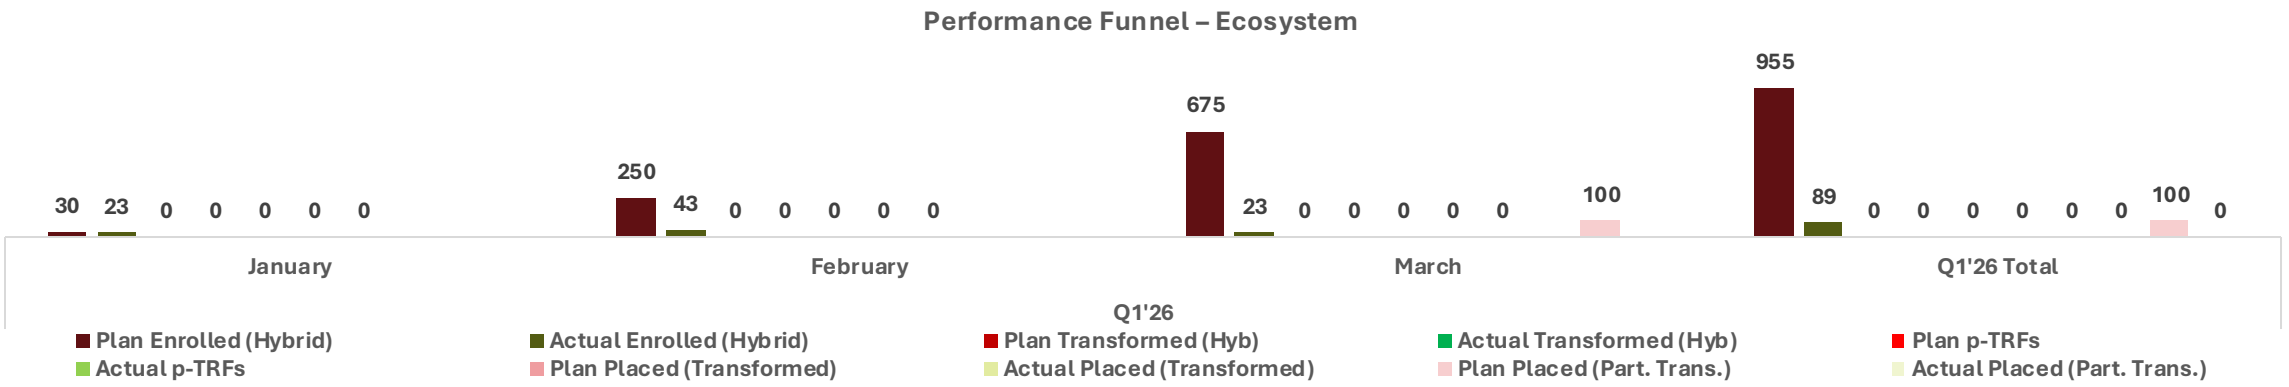
Non- Ecosystem:

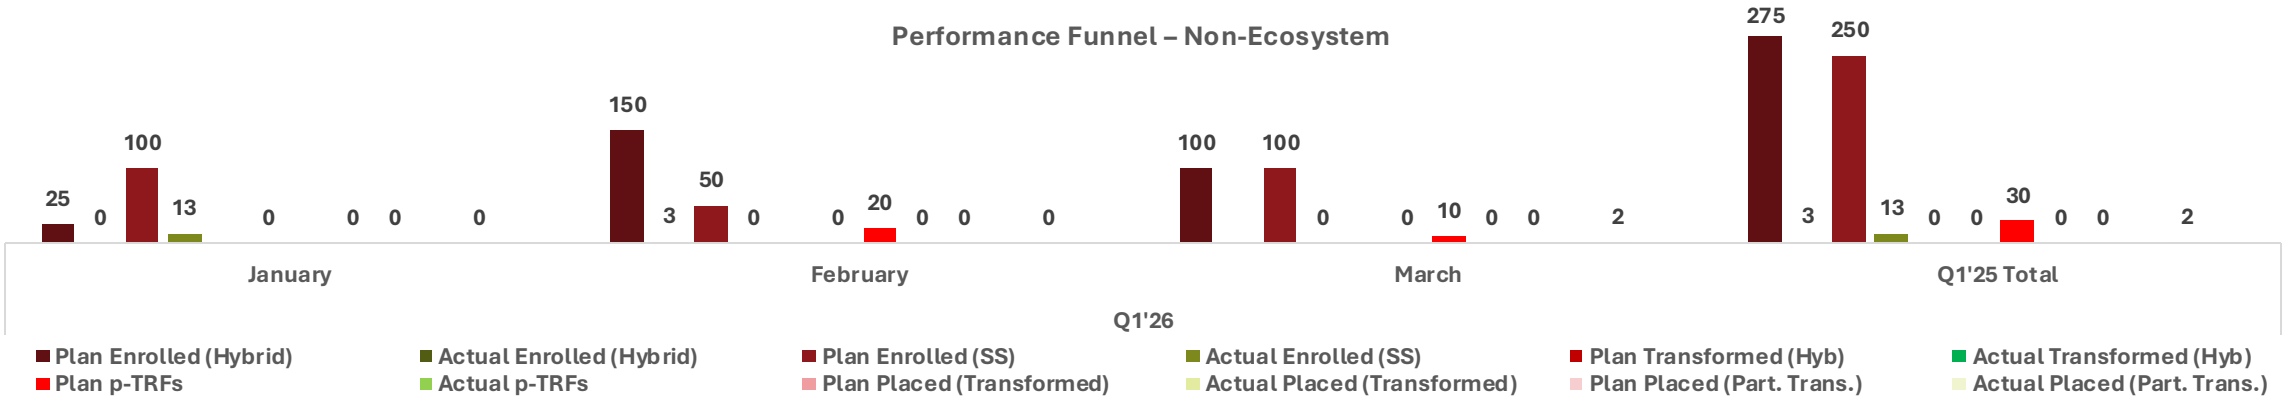
1. **Transformations:** No transformations have been recorded yet
2. **Enabled (Partial Transformation):** Enablement's remain below YTD plan (8%, 35 vs 435 YTD plan).
3. **Enrolments:** While hybrid enrolments remain significantly below the YTD plan (34%, 5.1k vs 5k YTD plan), Self-Serve enrolments have significantly exceeded the plan (221%, 11k vs 5k YTD plan)

Self-Serve enrolments are currently being reported to Non-Ecosystem and may get reclassified in the upcoming reports.

Legend: <50%, 50-80%, >80%

Egypt | Performance vs Plan Operational Drivers (2026)





Key Observations & Action Notes

Incremental Placements & Placements: Placement tracking will commence post the ~3-month eligibility window from transformation/ enablement.

Ecosystem:

1. **Transformations & Enabled (Partial Transformation):** None have been recorded yet.
2. **Enrolments:** Hybrid enrolments remain quite weak, and below YTD plan (9%, 86 vs 955 YTD plan).

Non- Ecosystem

1. **Transformations & Enabled (Partial Transformation):** None have been recorded yet.
2. **Enrolments:** Hybrid & Self-Serve enrolments remain quite weak and significantly below plan (~1%, 5% respectively)

Self-Serve enrolments are currently being reported to Non-Ecosystem and may get reclassified in the upcoming reports.

Legend: <50%, 50-80%, >80%

Thank You!

Appendix A – Placement Extrapolation (2025)

Placements from 2025 (as of Mar'26)

Region	Eligible Population	Expected Sample	Sample Surveyed (Completed calls)	Placed (Surveyed)	Not Placed (Surveyed)	Placement Rate (confirmed placements/ completed calls)	Extrapolated Placements	True Placements	True Incremental Placements
India	29035	5714	4923	2266	2657	46%	13364	6816	2290
Brazil	627	411	51	22	29	43%	234	140	38
Philippines	3899	1359	300	92	208	31%	1196	639	198
Indonesia	2161	311	63	40	23	63%	40	21	3

Placement validations for Brazil, Philippines and Indonesia are currently on-hold, and will only be re-started in CY26, post confirmation of student graduations from their institutions
For India, while Placement KPI takes the above calculations into account; for incremental placement KPI, AU and NASSCOM's nos. have been adjusted to take into account the IPS study data
Refer to CY25-Mar'26 Placement Calculations File for a detailed breakdown of region-specific placement information

Placements from 2025 (as of Dec'25)

Region	Eligible Population	Expected Sample	Sample Surveyed (Completed calls)	Placed (Surveyed)	Not Placed (Surveyed)	Placement Rate (confirmed placements/ completed calls)	Extrapolated Placements	True Placements	True Incremental Placements
India	20825	4109	3638	1501	2137	41%	8374	4438	1589
Brazil	627	411	51	22	29	43%	234	96	26
Philippines	2301	609	8	2	6		2	1	0
Indonesia	2161	311	63	40	23		40	20	3

Appendix B - Core Metrics

(O) – Outcomes, (O/P) - Output, (I/P) – Inputs, (A) – Attribution

Metrics	Definition (What?)	Triggers (When?)...	Method (How?)	Quality Assurance
Attributable Incremental Placements **(Hybrid Transformation Pathway) (O)**	In the current calendar year, estimated no: of transformed learners from current or previous enrolment years, securing placements attributable to WF's skilling initiatives, measured as incremental placement that would not have occurred in the absence of the program. This includes: • **Gold Standard:** Statistically validated A/B comparisons between learner batches and matched non-course learner batches, where control data is available. • **Silver Standard:** Conservative attribution based on self-reported learner attribution, where learners who attribute ≥50% of their placement success to the WF's skilling offerings contribute proportionately to incremental impact.	• **Baseline measurement** begins prior to cohort onboarding; retrospective baselines are acceptable for validated cohorts where prospective baselines are unavailable. • **Incremental placements** are credited in the year the placement occurs, following placement confirmation and attribution assessment.	**Gold Standard:** • Creation of matched control groups (non-course learners) based on domain, location, graduation timeline, and partner characteristics. • Measurement of differences in placement rates, time-to-placement, and salary improvements between treatment and control groups. **Silver Standard:** • Structured placement & attribution surveys administered to Transformed learners who are eligible for placements. • A statistical sample of (90% +/-5%) of eligible enabled learners is validated through independent surveys and results are extrapolated to the eligible enabled placement learner pool • Learner's attributing >= 50% of their placement success to the WF's skilling offerings are conservatively counted as contributing 50% of a placement toward incremental impact.	• Impact Team will validate of control group comparability and sample sufficiency for Gold Standard studies. • Explicit exclusion of *Enabled* and *Engaged* learners from Gold Standard attribution. • Documentation and version control of all attribution assumptions and thresholds.
Attributable Incremental Placements **(Enablement Based Pathway) (O)**	In the current calendar year, estimated no: of enabled learners from current year enrolments, securing placements attributable to WF's skilling initiatives, estimated using Silver Standard attribution This includes: • **Silver Standard:** Conservative attribution based on self-reported learner attribution, where learners who attribute ≥50% of their placement success to the WF's skilling offering contribute proportionately to incremental impact.	After the students' are classified as enabled, with a placement lead time of 90 days across all partner types	**Silver Standard:** • Structured placement & attribution surveys administered to enabled learners who eligible for placements • A statistical sample of (90% +/-5%) of eligible enabled learners is validated through independent surveys and results are extrapolated to the eligible enabled placement learner pool • Learner's attributing >=50% of their placement success to the WF's skilling program are conservatively counted as contributing 50% of a placement toward incremental impact.	• Impact Team will validate the placements via independent surveys • The placement percentage will be applied to eligible for placements learner pool to get the extrapolated placement nos. • Further, those attributing >=50% of their placement success will be conservatively counted as contributing to 50% of placements towards incremental placement. • Explicit exclusion of *Engaged* learners from Silver Standard attribution.
Attributable Incremental Placements ***(Engagement Based Pathway) (O)*** ***(Not considered in KPI achievement calculations, will be collected and reported separately)***	*In the current calendar year, estimated no: of engaged learners from current year enrolments, securing placements attributable to WF's skilling initiatives, estimated using Silver Standard attribution* *This includes:* • ***Silver Standard:*** *Conservative attribution based on self-reported learner attribution, where learners who attribute ≥50% of their placement success to the WF's skilling offering contribute proportionately to incremental impact.*	*When placement is confirmed during CY26*	***Silver Standard:*** *Learner self-reporting or partner confirmations*	• *Impact Team will validate a statistical sample of (90% +/-5%) of placed learners (engaged) through independent surveys and results will be extrapolated to the placed learner (engaged) pool* • *Further, those attributing >=50% of their placement success will be conservatively counted as contributing to 50% of placements towards incremental placement.*

For all Partial Transformation and its accompanying downstream KPIs (Placement & Incremental Placements), only learners classified as **Enabled** will be considered.

Appendix B - Core Metrics

(O) – Outcomes, (O/P) - Output, (I/P) – Inputs, (A) – Attribution

Metrics	Definition (What?)	Triggers (When?)...	Method (How?)	Quality Assurance
Attributable Incremental Placements (Offline Pathway) (O) ***(Not considered in KPI achievement calculations, will be collected and reported separately)***	*In the current calendar year, estimated no: of learners placed through WF-supported offline placement interventions e.g. job fairs, employer connects etc. without platform registration or engagement.* *This includes:* - ***Silver Standard:*** *Conservative attribution based on self-reported learner attribution, where learners who attribute ≥50% of their placement success to the WF's skilling offering contribute proportionately to incremental impact.*	*GTM teams submit the necessary placement data at the completion of the offline event.*	*GTM teams should provide the following details:* - *Event Name* - *Event Type (Job Fair, Employer Connect, Campus Drive etc.)* - *Date & Location* - *Partner Institute* - *Learner Data incl. Name, Phone No, Course, Graduation Year, Exposure to WF programs etc.* - *Employer & Job Details incl. Role, Joining Date, Compensation etc.*	• *Impact Team will validate a statistical sample of (90% +/-5%) of placed learners (offline) through independent surveys and results will be extrapolated to the placed learner (offline) pool* • *Further, those attributing >=50% of their placement success will be conservatively counted as contributing to 50% of placements towards incremental placement.*
Total Placements (Hybrid Transformation Pathway) (O)	In the current calendar year, the estimated no: of transformed learners from current or previous enrolment years, who are placed (secure a job), irrespective of the attribution	After the students' are classified as transformed, with a placement lead time of 90 days across all partner types	A statistical sample of (90% +/-5%) of eligible transformed learners is validated through independent surveys and results are extrapolated to the eligible transformed placement learner pool	- Impact Team will validate the placements via independent surveys - The placement percentage will be applied to eligible for placements learner pool to get the extrapolated placement nos.
Total Placements (Enablement Based Pathway) (O)	In the current calendar year, the estimated no: of enabled learners from current year enrolments, who are placed (secure a job), irrespective of the attribution	After the students' are classified as enabled, with a placement lead time of 90 days across all partner types	A statistical sample of (90% +/-5%) of eligible enabled learners is validated through independent surveys and results are extrapolated to the eligible enabled placement learner pool	- Impact Team will validate the placements via independent surveys - The placement percentage will be applied to eligible for placements learner pool to get the extrapolated placement nos.
Total Placements (Engagement Based Pathway) (O) ***(Not considered in KPI achievement calculations, will be collected and reported separately)***	*In the current calendar year, the estimated no: of engaged learners from current year enrolments, who are placed (secure a job), irrespective of the attribution*	*When placement is confirmed during CY26*	*Learner self-reporting or partner confirmations*	• *Impact Team will validate a statistical sample of (90% +/-5%) of placed learners (engaged) through independent surveys and results will be extrapolated to the placed learner (engaged) pool*

For all Partial Transformation and its accompanying downstream KPIs (Placement & Incremental Placements), only learners classified as **Enabled** will be considered.

Appendix B - Core Metrics

(O) – Outcomes, (O/P) - Output, (I/P) – Inputs, (A) – Attribution

Metrics	Definition (What?)	Triggers (When?)...	Method (How?)	Quality Assurance
Total Placements (Offline Pathway) (O) ***(Not considered in KPI achievement calculations, will be collected and reported separately)***	*In the current calendar year, estimated no: of learners placed through WF-supported offline placement interventions e.g. job fairs, employer connects etc. without platform registration or engagement.*	*GTM teams submit the necessary placement data at the completion of the offline event.*	*GTM teams should provide the following details:* - *Event Name* - *Event Type (Job Fair, Employer Connect, Campus Drive etc.)* - *Date & Location* - *Partner Institute* - *Learner Data incl. Name, Phone No, Course, Graduation Year, Exposure to WF programs etc.* - *Employer & Job Details incl. Role, Joining Date, Compensation etc.*	• *Impact Team will validate a statistical sample of (90% +/-5%) of placed learners (offline) through independent surveys and results will be extrapolated to the placed learner (offline) pool*
Learners Transformed (Hybrid Transformation Pathway) (O/P)	In the current calendar year, learners who are enrolled through Hybrid pathway, and are successfully assessed, and meet defined quality and assessment standards*, indicating high-confidence employability readiness.	All 3 mandatory components are completed and passed: (1) Pre/Post Video >=3/5 (2) >=70% of Collaborate reflections passed, (3) Full Course MCQ (FA + SA) passed (>=70% score in FA and SA individually) *Interview Prep will become part of the criteria (when it is integrated into the course)*	Platform analytics	- Checklist defined centrally and frozen for CY26 - Applicable only to learners enrolled in batch-mode full course journeys
Learners Enabled (Enablement Based Pathway) (O/P)	In the current calendar year, learners who are enrolled through Hybrid or Self-Serve pathway, and meet defined enablement thresholds*, reflecting exposure to employability capabilities but not full transformation. Includes Self-Serve learners and Hybrid learners who do not complete full transformation.	Score >=50 points across any combination of components. Not required to meet the Transformation checklist.	Platform analytics	- Thresholds defined centrally and frozen for CY26 - Exclusion of learners classified as Transformed
Learners Engaged (Engagement Based Pathway) (O/P) ***(Not considered in KPI achievement calculations, will be collected and reported separately)***	*In the current calendar year, learners who are enrolled through Hybrid or Self-Serve pathway, and use one or more light-touch offerings (e.g., job connect, interview prep, tools) but do not meet enablement thresholds* or complete Hybrid transformation.*	*Score 30–49 points across any combination of components*	*Platform analytics*	- *Thresholds defined centrally and frozen for CY26* - *Mutually exclusive from Transformed and Enabled learners*

For all Partial Transformation and its accompanying downstream KPIs (Placement & Incremental Placements), only learners classified as **Enabled** will be considered.

* See **Learning Classification: Scoring Tiers** for detailed Scoring thresholds

Appendix B - Core Metrics

(O) – Outcomes, (O/P) - Output, (I/P) – Inputs, (A) – Attribution

Metrics	Definition (What?)	Triggers (When?)...	Method (How?)	Quality Assurance
Learners Enrolled (Hybrid Transformation Pathway) (I/P)	In current calendar year, no: of learners enrolled into the flagship hybrid skilling programs, with structured delivery and formal assessments	When a learner signs up through partner institutes on the platform	System	
Learners Enrolled (Self-Serve Pathway) (I/P)	In current calendar year, no: of learners who register on the platform and access any offering, irrespective of depth of engagement	On platform registration	System	
Ecosystem	A defined local geography (district, cluster of districts or industrial corridor) within which Skilling deploys a coordinated portfolio of structured course and non-course offerings to enable job fulfilment (placements)
